

YOUR ENGINEERING DELIVERY

PRE-FEED ENGINEERING PACKAGE

YOUR PROJECT. THE FULL PACKAGE.

Hydrogen / Energy from waste / Heat & industrial integration.

Report + drawing set + calculations + equipment data + cost model

Illustrative package visualization. Project-specific scope is defined on the following page.

ENGINEERING DELIVERY / THE DELIVERABLES

WHAT YOU RECEIVE.

A coordinated engineering package for your project.

01 PRE-FEED REPORT

Design basis, battery limits, concept comparison and selected configuration. Recommendations and next-phase requirements in one indexed technical report.

02 PROCESS DRAWINGS

BFDs, PFDs and stream tables. Preliminary P&IDs, utility schematics, concept arrangements and tie-in drawings for the agreed systems.

03 CALCULATIONS & BALANCES

Mass and energy balances, equipment duties, utility loads and operating scenarios. Editable models with a traceable input and assumption basis.

04 DATASHEETS & MTO

Equipment, line and instrument registers; preliminary datasheets and sizing; material quantities and vendor-input requirements at the agreed maturity.

05 CAPEX & OPEX

Capital and operating costs, estimate basis and ranges, cash flows and sensitivities. Economics connected to the engineering and operating cases.

06 FEED HANDOVER

Interface and preliminary hazard registers, outstanding studies, execution sequence and an agreed engineering scope for the next phase.

DEFINE YOUR PACKAGE

Bring your project objective, design basis and decision date. Receive a deliverable register, input list, programme and fee proposal.

PDF report and drawings + editable models and registers. Native formats, review gates and design maturity are agreed in the deliverable register.
